BOTANISCHER GARTEN ZU HAMBURG.

TORREY CORRESPONDENCE HERBARIUM COLUMBIA UNIVERSITY.

Botanischer Garten zu Hamburg

den 16th May 1836.

Dear Sir!

At my proposal the Regiond botanical Society of Regensburg elected to be Members You and Dr A. Gray, and desired me to transmit to You the Diplomas which You receive accordingly together with these lines. Any communication which You may hereafter intend to be made to the said Society, I shall readily forward, and request therefore my desire, that You will address to me all whatever You may destine for the interior of our country.

The sendings which I forwarded to You since Your last letter consisted in:

1, Diplomas of the Leopold. Carol. Academie, for You and Dr. A. Gray.

2, A complete Set of the Linnaea, in two different sendings.

3, The most recent Volume of the Acta Acad. Leop. Carol. naturae curiosorum, together with Flora Bor. Silviensis and Reise ab Euenbeck Erinnerungen aus dem Riesengebirge &c.

All which I hope will have safely reached You. Pray present my sincere respects to Dr A. Gray and continue to remember friendly Your most true

TORREY CORRESPONDENCE HERBARIUM COLUMBIA UNIVERSITY.

TORREY CORRESPONDENCE
HERBARIUM
COLUMBIA UNIVERSITY.

Dear Sir!

Excuse kindly my having not allready long before this answered to Your letter dated 24th October 1836 with postscript of the 15th March 1837, and that it was only by Dr A. Gray, that I returned my thanks for the interesting pamphlets and dried plants, which You had forwarded to me together with the mentioned letter, though they did not reach me but a long time afterwards.

The chief reason of my retarded answer is, that I was quite unwilling to appear with void hands, and even to day I can not yet, what I hoped to do, send the South African Cyperaceae, I send however other plants of that country, partly new ones, and hope them to be welcome.

I should be very glad to learn, that the package containing the 6 to 10th Volumes of the Linnaea, the receipt of which had been acknowledged by the Custom House of New York, has been found out again and delivered to You, not even with regard to the Volumes of the Linnaea, but chiefly in return of a collection of maritime Algae accompanying them, because I would not been able to compleat them at [illegible] for a second time.

The wanting parts of the Annals of the Lyceum of Nat. History, which You had the kindness to promise me by Dr Gray, came not yet to hand, and Dr Gray tells me in a Letter

TORREY CORRESPONDENCE
HERBARIUM
COLUMBIA UNIVERSITY.

Letter dated 26th of November last (but received in the month of March) that the said Annals would be sent by the Society itself. Pray have the kindness to remember of this object. At the same time I beg leave to request that for my Herbarium any plants You have to dispose of will be very acceptable, that however the Algae, as well the fresh water ones as those of the coasts form a darling object of my wishes.

All what I have received from You, to be forwarded has met due attention. I have also on receipt of Your Letter informed the Royal bot. Society of Regensburg (having had the pleasure to propose You their member) that their Diploma had safely reached You.

I guess that Dr Gray has already begun his interesting tour to the South seas. If, opportunity offering, You should write to him, then pray let him know that his letter of the 26th of November did not reach me but in the month of March last, and that I omitted answer only because according to that letter I could not but suppose, that my answer would not find him home. All objects which his letter refers to, I have received and forwarded as mentioned above.

I take the liberty to transmit You several copies of my 7th Exsiccata for distribution, desiring You to retain one of them for Dr Gray.

A young promising botanist Mr Preiß has been sent

by

me to the Westcoast of New South Wales in order to collect during a residence of upwards five years the plants of that country, and to send them successively over to me. Half a year ago he departed via the Cape of good hope, and if he lives I dare hope to receive many and interesting plants from that part.

Pray continue to remember friendly. Dear Sir

Your most sincere

Lehmann DD.

Mon cher ami,

LIBRARY
NEW YORK
BOTANICAL
GARDEN.

J'ai reçu avec le plus grand plaisir votre lettre du 8me Decembre et je vous félicite pour le bon voyage que vous avez eu pour le retour dans votre patrie.

Vous devez avoir reçu à présent ma lettre du 27me Septembre et la caisse de Mons. de Schlechtendal, expedié avec le vaisseau Howard Capt. Flor au commencement du mois d'Octobre. Je vous envoie aujourd'hui la caisse que Mons. Torrey vous avait adressée, et qui arrivait trop tard chez moi pour vous être remis ici.

J'ai trouvé dans cette caisse un paquet avec mon adresse, destiné pour moi par Mr. Torrey. Je l'ai ouvert et j'ai trouvé un paquet pour Mr. Torrey que vous voudrez bien lui donner.

Comme vous savez mon cher ami que les plantes rares de votre patrie me seront toujours très-bien venues, et que celles dont je possede déjà un exemplaire par votre bonté, le seront encore pour mes amis et correspondents, je n'ai pas voulu noter quelque chose en particulier dans les collections que je vous renvoie aujourd'hui. Donnez moi ce que vous voudrez et vous me ferez un grand plaisir.

J'ai des complements a vous faire de la part de ma femme et j'ose espérer, que vous me permettrez de me nommer

Votre
ami fidèle et très-devoué
Lehmann

P.S. Pour la petite monographie du genre Lupinus j'en ai reçue un second exemplaire et je vous demande de vouloir garder celui que vous avez comme un petit souvenir de votre séjour à Hamburg.
